DETAILED ACTION

This Office Action is in response to the application filed by Gideon Stein on April 14, 2001 for the invention titled "System and Method for Generating a Model of the Path of a Roadway from an Image Recorded by a Camera".

Claim 1 is presently pending.

Information Disclosure Statement

The IDS filed by Applicant on October 1, 2002 has been fully considered by the Examiner, as indicated by the accompanying initialed copies of Applicant's form PTO-1449.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being clearly anticipated by the article titled "A Monocular Vision System for Autonomous Vehicle Guidance" which was submitted by Applicant as Prior Art in the IDS of 10/1/02.

Art Unit: 3661

Applicant's claim 1 recites a "road skeleton estimating system" for generating an estimate of at least a portion of the roadway ahead of a vehicle comprising: an image receiver capable of recording at least one image ahead of the vehicle, and a processor configured to process the image information and generate an estimate of a skeleton of at least a portion of the roadway ahead of the vehicle.

The Monocular Vision article by Maganto et al. teaches the use of a video camera and an accompanying processing system that acquires, processes and analyses the image (as described in the system overview section), so as to provide at least a trapezoid whose left and right edges correspond to the edges of the road. This section also goes on to describe the low-level analysis of textures as well as a segmentation process in which sensitive areas (SA) of the road can be found.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Pipala whose telephone number is (703) 305-9785. The examiner can normally be reached on Monday through Thursday from 7:30 to 6:00.
